### Job mission:

We are making a significant strategic investment in further developing Pricing sophistication in our European markets. As a Senior Pricing Analyst in the Street Pricing team you will play a key role in the execution of our Grow 2025 Pricing Sophistication strategy aiming to implement best-in-world Pricing. You will partner with the Product teams in initiating and driving the vision, strategy and deliverables to meet key objectives in a fast-paced, results-driven environment.

Successful candidates will use a combination of outstanding analytical reasoning, business acumen, and technical skills to deliver data-driven price change recommendations. They will also use their ability to analyse and understand complex data to drive decisions and will have strong cross-functional skills and will be comfortable working closely with Product and UW teams.

### Key Tasks & Responsibilities

- Create accurate and timely Pricing analysis and assist in making recommendations to support key business objectives.
- Provide support to a range of stakeholders by performing analysis within designated business segments to assist business decision making and financial planning.
- Assessing profitability and recommending changes for key lines of business based on appropriate tools and assumptions.
- Provide clear and concise communication of technical actuarial work to technical and non-technical audiences.
- Support the on-going review of pricing practices, recommending changes and improvements that meet best practice and business objectives and comply with company policies and guidelines.
- Develop, analyse and monitor key performance indicators and assess expected and actual impact of pricing changes.
- Build, validate and analyse Pricing models for a variety of purposes.
- Develop solutions, under your own initiative, using sound actuarial/statistical approach to both new and routine Pricing problems.
- Perform rigorous validation of data in advance of analysis and actively recommend improvements to data quality.
- Help develop positive relationships between the Pricing area and its business stakeholders.
- Provide guidance and training to less experienced staff to help their learning and performance.

### Qualifications

- Master's degree in actuarial science, Mathematical or Statistical Studies
- Actuarial Science Masters preference

### Our values

### Knowledge & Experience

- 3+ years' experience in pricing, analytics, consultancy, or related field
- Advanced analytical skills with previous experience of applying actuarial/statistical methodologies to business problems
- Previous experience with analytical software such as – Earnix, Emblem, Radar, SAS, Python, R
- Sound understanding of the general insurance industry and of the business implications of analytical results

### Competencies

- Highly motivated with a genuine interest in GI Pricing
- Excellent organizational skills and attention to detail
- Good oral, written and presentation communication skills with ability to interact effectively with business stakeholders
- Strong interpersonal skills with a clear ability to work effectively as part of a team
- Problem-solving skills to deliver quick and efficient solutions
- Self-starter, who can manage multiple projects simultaneously and drive them to completion.
- Proficiency in English and Spanish/Portuguese language skills or an interest in learning

Liberty Insurance/Liberty Seguros is an equal opportunity employer
